DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 08/05/2005 have been fully considered but they are not persuasive. Specifically, in Song et al., in Fig. 2, plurality of pads 24 and 74 are extending at a straight angle from the edge of the substrate 10 and plurality of pad lines extending at a diagonal angle from these pads.

Allowable Subject Matter

1. Claims 11-20 allowed.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-10 rejected under 35 U.S.C. 103(a) as being unpatentable over Song et al. (6,531,392) in view of Kim (6,052,169)

Regarding Claims 1-10, Song et al. disclose a method of forming a thin film transistor array panel using photolithography techniques where in Fig. 2 it is shown pads 24 and 74 with diagonal lines extending from these pads, gate lines 22 and data lines 62 and 72. Song et al. fail to disclose the required pad and driving/gate/data/signal line relationship. However, Kim discloses a liquid crystal display device having an equipotential electrode structure where in

Art Unit: 2826

Figs. 1-4, the required pad and driving/gate/data/signal line relationship configuration is disclosed.

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required pad and driving/gate/data/signal line relationship in Song et al. as taught by Kim in order to have a liquid crystal display device with increased reliability.

Conclusion

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
